

Bremworth

QUALITY POLICY

We will consistently manufacture, and market products engineered to meet or exceed the expectations of the user at a fair market price.

In the process of marketing and supporting these products we will provide a level of service to the customer that exceeds their normal expectations and gives rise to external customer consensus that Bremworth's customer service is world class.

We will apply, on an ongoing basis, whatever training and development is required to attain and adhere to these policies. We will also define and adhere to all standards, specifications, and procedures necessary for the attainment of the policy goals.

In areas of interaction with the customer or consumer, our procedures will be defined in a way which empowers our employees to perform in a manner consistent with our policy objective, unfettered as far as possible by rigid rules and regulations.

Greg Smith
