

Maintenance Electrician

- Flexible hours
- Permanent day shift, Monday – Friday
- Strong team environment
- On job training with career progression opportunities

This role is well suited to a production engineering all-rounder who is passionate about doing the job properly first time around and thrives in challenging environments. We embrace learning and strive to help each other to succeed as a team.

Bremworth is an iconic New Zealand brand offering premium wool carpets and rugs uniquely designed and made in New Zealand.

With over 60 years in the flooring business, Bremworth's ingenuity to innovate with natural materials aims to make homes more sustainable, and safer.

Through operations in Auckland, Napier and Whanganui, Bremworth sources the best quality New Zealand wool for crafting woollen yarn into premium carpets and rugs.

Role Description:

To maximise the effectiveness and availability of plant and machinery to meet production demand. This position will help lead the maintenance planning necessary for the manufacturing operation and the safety of Plant employees.

This is a varied engineering role encompassing hands on electrical work; asset management from a maintenance perspective – planned, preventative & reactive; coordinating sub-contractors to carry out technical work; and supporting other stakeholders with planned shutdowns.

More information on technical expertise required below:

- Perform a wide range of engineering tasks by operating computer-assisted design or engineering software and equipment.
- Provide information and contribution into the compilation and control of maintenance budgets for the Napier site and manufacturing process.
- Design plant modifications, additions and improvements to meet or exceed the OEE performance expectations.
- Help coordinate daily, weekly and annual shut downs by planning resource requirements, labour and equipment.
- Complete all electrical repairs and maintenance in accordance with the site's annual maintenance plan.
- Raise purchase orders for materials and equipment needed to install or repair electrical wiring and equipment.

Bremworth

- Test and service electrical equipment and machinery to ensure safe operating condition.
- Resolve day to day electrical malfunctions as soon as practical to ensure continuity and minimal plant down time.

Desired Skills and Experience:

- At least 5 years' experience of plant maintenance, ideally within the manufacturing industry
- Trade Certification in Electrical Engineering

We offer the hours of Monday to Friday, 7am – 3:30pm, but are very flexible regarding hours and days worked, with a competitive rate and relocation costs for the right candidate.

Due to Covid-19, we are only accepting applications from New Zealand Citizens, New Zealand Residents or overseas applicants who hold a valid visa and are currently residing in New Zealand. These criteria will be strictly enforced and if you don't fulfil these residency criteria your application will not be considered.

Our culture and our core values drive our business. If you are passionate about Electrical Engineering and want to be part of our growing, dynamic team, **please send us your CV with a cover letter telling us about yourself and why you think you would be a good fit for our business. Please contact by email careers@bremworth.co.nz**
